Incubator Shaker Accessories 15-16

Overview

7/10 Inches Touch Screen

High resolution touch screen enables easy operation. It displays time, speed, temperature, humidity and all other set values. User can set up to 12 steps for different experiment requirements.

Sliding Out Platform

This slide out design makes loading and cleaning very easy. User can pull the locking handle by using just one hand to load and unload the fixtures which is fast and convenient.

Stackable Up To 3 Units

Suggest to use floor stand for one unit or 2 units purchase

Users can purchase either one, two or three units which can be stacked directly on the floor. For one or two units, it is highly recommended to stack on the floor stand provided by Welso.

Data Storage

USB port for data transmission

Welso incubator shakers record temperature, speed, concentration and humidity every minute. Users can check all records in 7 days. Or users can export 2.5 years data for future reference.

Magnetic Drive

Welso incubator shaker features a magnetic drive with triple-eccentric counterbalance shafts which provides stable, reliable and consistent shaking. The magnetic non-belt drive design ensures no scraps and less maintenance which extends service life of incubator shaker even in harsh environment.

IQ/OQ Documentation

Welso incubator shakers software can control and record temperature, speed, concentration, and humidity which are compatible with FDA CFR21 Part 11 for traceability. IQ/OQ documentation can be provided according to GMP procedures.

Optional Remote Monitor

iPhone&Ipad (Android/Apple)

Software

User can use software to monitor up to 32 units of incubator shakers by using LAN.
